Other Publications

In addition to THE RESEARCH ENGINEER, the Georgia Tech Engineering Experiment Station publishes circulars, bulletins, reprints and special reports covering the fields of science and engineering in which the Station offers research services. These include aeronautics, ceramic engineering, mathematics, mechanical engineering, physics, public health, biology and sanitary engineering, textile engineering and industrial economics, among others.

The latest publication in each category is as follows:

Weil, B. H. and Herschel H. Cudd, "1949-50 at Georgia Tech Engineering Experiment Station," 1950. Circular 29. Gratis.

Wastler, T. A., "Naval Stores Industries—Research Needs," 1954. Bulletin 20. Gratis.

Ingols, R. S., H. W. Hodgden and J. C. Hildebrand, "Taste and Odor, Study of Tastes and Odors Produced by Chloridation of Simple Nitrogenous Compounds." Reprinted from **Agricultural and Food Chemistry**, Vol. 2, No. 21, pp. 1068-1070, Oct. 13, 1954. Reprint 88. Twenty-five cents.

Weil, B. H., Poagie Murray, George W. Reid and Robert S. Ingols, "Bibliography on Water and Sewage Analysis," 1948. $4.00.

The publications list is comprised of more than 150 items, most of which are still in print. For a copy of the latest list, or for information about the technical publications of the Station, write:
